Neurometer® CPT
Sensory Nerve Conduction Threshold (sNCT®)
Electrodiagnostic Evaluation
June, 2008

Overview and References

Appendix F.
Comprehensive Bibliography

The following pages list more than 500 published scientific publications through June 2008, utilizing Neurometer® technology. This document is periodically updated and available upon request from Neurotron, Inc. and may be downloaded from Neurotron’s website at http://www.neurotron.com.

11. Angst, M.S., Poree, L.R., Dyck, J.B. Evaluation of Sequential, Centering and Spacing Bias in a New Experimental Pain Model in Humans. 8th World Congress on Pain, Vancouver. page 332(6), International Association for the Study of Pain Press, Seattle, 1996.

19. Arita, H., Bunketsu, H., Sekiyama, Y., Sato, Y., Chinzei, M., Ide, Y., Hanaoka, K. Change in 
CPT by Neurometer® Before and After the Drug Challenge Test (DCT) in the Patients with 
Hard-to-Cure Chronic Pains. Ninth Annual Meeting, Japan Pain Clinic Association, Tokyo 
Division, 11, 1997.

Current Perception Threshold (CPT) sensory Nerve Conduction Threshold (sNCT) Research 
Group Meeting, No. 1, Tokyo, Japan, 2000.

22. Avram, M.M. Neurological Complications in Chronic Uremia Management. Morbidity and 
Mortality of Dialysis NIH Consensus Development Conference, pp. 123-128, National Institute 
of Health (USA), Bethesda, MD, 1993.
